

South Carolina Economic Analysis Report

SOUTH CAROLINA Department of Employment & Workforce

June 30, 2023

An examination of the state's
economy and workforce.

**Labor Market
Information**

ABOUT DEW AND LMI

The Labor Market Information Division compiles and publishes employment statistics, job forecasts, wage data, demographics, and other labor market information to help public and private organizations, researchers, and others better understand today's complex workforce.

www.dew.sc.gov

www.jobs.scworks.org

The 2023 South Carolina Economic Analysis Report is published by the Labor Market Information Division (LMI) of the S.C. Department of Employment and Workforce (DEW). The information and analyses provided in this publication are based on data collected from sources throughout South Carolina and the United States.

Executive Summary

The state's population continues to increase. By 2021, the percentage of the population graduating high school and those obtaining at least a bachelor's degree increased to 89.6 percent and 31.5 percent, respectively. The veterans' share of the population decreased over the 2017-2021 period from 9.3 percent to 8.7 percent, as did the disabled population from 2017 to 2021, from 14.8 percent to 14.2 percent.

The female population in South Carolina is slightly higher than the male population, with females making up 51.4 percent and males comprising 48.6 percent. The median age range in the state is 40.2 years old. White residents make up 63.6 percent, or 3.3 million. The smallest population is the Native Hawaiian and Other Pacific Islander racial group, consisting of a little more than 2,100 people.

The labor force is composed of 2.365 million people out of a civilian noninstitutional population totaling 4.204 million, resulting in a labor force participation rate of 56.3 percent. In terms of educational attainment, over 39 percent of the employed workforce held a bachelor's degree or higher.

South Carolina's labor market has improved over the past several years with the labor force and employment levels reaching all-time highs in 2022. The unemployment rate had a tumultuous period, reaching a high of 11.7 percent in 2020 and a low of 2.4 percent in 2019.

South Carolina had more than 166,000 business establishments in 2021, with 2.192 million jobs held, paying an average weekly wage of \$1,079. The Accommodation and Food Services industry grew the most in average weekly wages from the previous year at 13.7 percent, while the Arts, Entertainment, and Recreation industry grew the most in average employment at 25.4 percent. For emerging industries, the Amusement, Gambling, and Recreation Industry has the highest percent change (23.1 percent) from 2020 to 2030, reflecting a positive future for growth. Scenic and Sightseeing Transportation is a close second, with a 22.1 percent growth from 2020 to 2030.

South Carolina had more than 2.152 million wage and salary jobs in occupations in 2022 with an average hourly wage of \$24.35. Office and Administrative Support and Sales and Related occupations had the highest number of jobs in 2022, followed by Food Preparation and Serving Related occupations and Transportation and Material Moving occupations, respectively.

Registered Nurses and Retail Salespersons were the top two most requested positions in advertised job postings in 2022. A labor supply-demand analysis shows that there were almost 11,700 more job openings in 2021 than graduates from the state's colleges to fill them.

Post-Secondary Employment Outcomes, or PSEO, data provide information on earnings and employment outcomes for graduates of programs beyond high school. The Doctoral – Research/Studies award level shows the largest wage increase from year one post-graduation to year 10 post-graduation, at just over \$23,000. Library Science has the most employment based on Classification of Instructions Programs (CIPs), followed by Engineering.

South Carolina's Gross Domestic Product (GDP) was \$295.8 billion in 2022. The growth rate from the previous year, in real inflation-adjusted dollars, was 2.4 percent. The top two industries in value in 2022 were Finance, Insurance, Real Estate, Rental, and Leasing followed by Manufacturing. The Information industry grew the most in terms of real dollars from 2021 to 2022, followed by Professional, Scientific, and Technical Services within the Professional and Business Services industry.

The state's total exports in 2022 valued \$31.4 billion dollars, or 11 percent of the state's GDP, for the year. Transportation Equipment, the top export commodity, represented 45.5 percent of the total export value, followed by Chemicals at 13.1% and Plastics and Rubber Products at 8.4%. Canada, Germany, and China were the state's top three export partners, respectively.

The state workforce development board's designated priority populations face challenges to employment that workforce officials can help overcome. Those populations include juvenile offenders, ex-offenders, homeless, veterans, and others.

South Carolina is divided into 12 Workforce Development Areas or WDAs: Catawba, Greenville, Lowcountry, Lower Savannah, Midlands, Pee Dee, Santee-Lynches, Trident, Upper Savannah, Upstate, Waccamaw, and Worklink. An examination of occupational employment and wages, industry and occupation projections, and in-demand occupations by wage for each WDA is included.

Introduction

The purpose of the South Carolina Economic Analysis Report is to present an overview of key metrics used in examining South Carolina's economy and workforce. The Labor Market Information Division of DEW compiles and publishes numerous data series on the state of the workforce. These measures and other pertinent data sources were utilized in this examination.

This report highlights numerous measures illuminating the state's economy. South Carolina's population trends start the report, including results from the 2021 American Census Survey. Geographic Profiles from the Bureau of Labor Statistics Current Population Survey will follow. Labor force trends and unemployment rate trends will also be analyzed.

Statewide current industrial employment and wages, occupational employment and wages, and the top in-demand occupations are included. A labor market supply-demand gap analysis forms the next section, followed by a look at post-secondary employment outcomes. South Carolina's gross domestic product data will be discussed, in addition to information on foreign trade.

An examination of our state's priority populations follows the prior sections, and, to close out the report, an in-depth analysis of the workforce conditions in each of the 12 workforce development areas is provided, to include information on in-demand jobs, occupation and wage data, and job projections by industry and occupation.

SOUTH CAROLINA'S POPULATION TRENDS

Certain population characteristics are important in terms of economic and workforce issues. Among those characteristics are educational attainment, veteran and disability status, and geographic mobility. A more educated workforce attracts industries into the state. Veterans offer work skills that are attractive to potential employers. The disabled workforce may require special conditions for employment. A mobile population can take advantage of their workforce skills in regions best suited for them.

Figure 1 displays such information for the state over the five-year period of 2017-2021. Over time, lower percentages of the population aged 25 and older report an education of less than a high school diploma, and higher percentages report obtaining more than a high school education. In 2021, 89.6 percent of the population aged 25 and older had a high school education and 31.5 percent held a bachelor's degree or higher. The increasingly educated population bodes well for the state economically.

FIGURE 1: POPULATION STATISTICS, 2017-2021

Statewide	2017	2018	2019	2020	2021
Educational Attainment	3,443,851	3,492,355	3,563,204	3,626,831	3,598,398
Less than 9th Grade	4.0%	3.6%	3.7%	3.0%	3.2%

Source: U.S. Census Bureau ACS 1-Year Estimate, Table CP02- Comparative Social Characteristics in the United States

The proportion of veterans in the population aged 18 or higher decreased from 2017 to 2020 but increased slightly in 2021 to 8.7 percent. The percentage of South Carolinians with a disability among the noninstitutional population decreased since last year to 14.2 percent. The proportion over the age of 65 with a disability declined 2 percent during the four-year period, to 32.1 percent. The percentage of residents staying in the same home had been trending upward from 2017 to 2020 but decreased in 2021 to 86.4 percent.

Over the recent past, South Carolina's population aged 18 and above has been on the rise. From 2017 to 2021, the state increased by 152,000 people, or 3.9 percent, to 4,042,341, fueling the state's growing workforce. This growth is highlighted in the following section.

American Community Survey Results

South Carolina continues to be a growing state in terms of population and diversity. As seen in **Figure 2** below, females make up 51.4 percent of the total population, and males make up 48.6 percent. A little more than half the state is composed of people aged between 25 and 64 years old, with the median age being 40.2 years old.

FIGURE 2: SOUTH CAROLINA GENDER AND AGE DEMOGRAPHICS

Source: U.S. Census Bureau, 2021 ACS 1-Year Estimate

Figure 3 depicts the racial demographics within the state. The White population makes up most of the state population, at 63.6 percent, or 3.3 million residents, while the Black or African American population makes up 25 percent, or about 1.3 million residents. The smallest population is the Native Hawaiian and Other Pacific Islanders, consisting of a little more than 2,100 people out of the nearly 5.2 million total population.

FIGURE 3: SOUTH CAROLINA RACIAL DEMOGRAPHIC BREAKDOWN

Race	Estimate	Percent
Total population	5,190,705	100%
One race	4,850,172	93.4%
Two or more races	340,533	6.6%
White	3,301,055	63.6%

Geographic Profiles

In 2022 from the Bureau of Labor Statistics Current Population Survey, the labor force in South Carolina comprises 2.365 million individuals out of a civilian noninstitutional population totaling 4.204 million, resulting in a labor force participation rate (LFPR) of 56.3 percent. The following table presents the employment status of various subpopulations within the state for the same year.

FIGURE 4: 2022 EMPLOYMENT STATUS OF POPULATION BY VARIOUS DEMOGRAPHICS

Population Group	Civilian Non-institutional Population	Civilian Labor Force					
		Total	Percent of Population	Employed		Unemployed	
				Total	Percent of Population	Total	Rate
Total	4,204	2,365	56.3	2,285	54.3	80	3.4
Men	1,995	1,215	60.9	1,169	58.6	45	3.7
Women	2,210	1,150	52.1	1,115	50.5	35	3.0
Men and women, 16 to 19 years	261	97	37.1	84	32.3	13	13.0
Married men, spouse present	990	628	63.4	617	62.4	10	1.7
Married women, spouse present	1,011	531	52.5	522	51.7	8	1.6
Women who maintain families	337	208	61.8	203	60.1	5	2.6
White	2,964	1,668	56.3	1,622	54.7	46	2.8
Men	1,436	885	61.6	858	59.8	26	3.0
Women	1,528	783	51.2	763	50.0	20	2.5

Hispanic or Latino ethnicity	265	182	68.6	177	66.9	5	2.5
Men	128	106	82.5	103	80.4	3	2.6

[Numbers in thousands]

Source: U.S. Bureau of Labor Statistics, Current Population Survey, 2022 Annual Averages

Note: Data for demographic groups are not shown when the labor force base does not meet the BLS publication standard of reliability for the area in question, as determined by the sample size. Detailed items may not sum to totals because of rounding. Estimates for the race groups shown in the table (White, Black, and Asian) do not sum to totals because data are not presented for all races. In addition, people whose ethnicity is identified as Hispanic or Latino may be of any race and, therefore, are classified by ethnicity as well as by race. Data incorporate updated population controls.

When examining gender specific LFPRs, men displayed a rate of 60.9 percent, while the women's rate stood at 52.1 percent. Additionally, the unemployment rate for men was 3.7 percent, while women experienced a slightly lower rate of 3.0 percent. Regarding racial demographics, both White and Black populations showed similar LFPRs, 56.3 percent and 56.2 percent, respectively. In contrast, Hispanics or Latinos had a higher LFPR of 68.6 percent in 2022.

The level of educational attainment within the workforce plays a vital role in South Carolina's expanding economy. As indicated in **Figure 5**, the civilian noninstitutional population aged 25 and older had the largest representation of individuals with a bachelor's degree or higher, accounting for 1.223 million people, equivalent to 33.8 percent of the total population. Over 39 percent of the employed workforce also held a bachelor's degree or higher.

FIGURE 5: 2022 EMPLOYMENT STATUS OF POPULATION BY EDUCATIONAL ATTAINMENT

Educational Attainment	Civilian Non-institutional Population	Civilian Labor Force					
		Total	Percent of Population	Employed		Unemployed	
				Total	Percent of Population	Total	Rate
Less than a High School Diploma	318	121	38.0	113	35.5	8	6.4
High School Graduates, No College	1,162	593	51.1	572	49.2	22	3.7
Some College or Associate's Degree	917	538	58.7	525	57.3	13	2.3
Bachelor's Degree and Higher	1,223	796	65.1	783	64.1	13	1.6

[Numbers in thousands]

Source: U.S. Bureau of Labor Statistics, Current Population Survey, 2022 Annual Averages

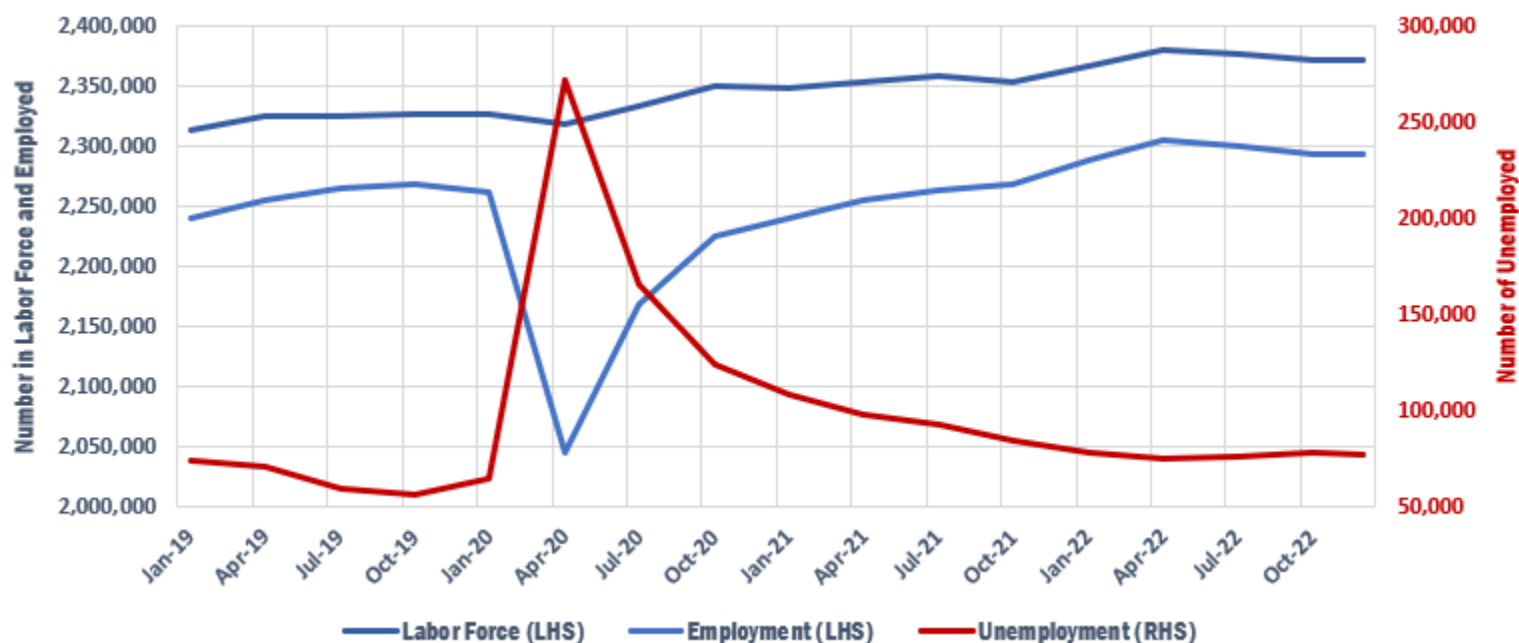

Furthermore, the data in the table reveals a positive correlation between educational attainment and LFPR. Individuals with less than a high school diploma exhibited an LFPR of 38.0 percent, while those with a bachelor's degree or higher significantly increased their LFPR to 65.1 percent. This information underscores that postsecondary education results in higher rates of labor force participation compared to the state's overall average.

LABOR FORCE TRENDS

An important component of the economy in South Carolina is the labor force. The labor force records individuals at their residence location and equals the sum of the employed and the unemployed. **Figure 6** illustrates the movement of the labor force (left-hand scale), employed (left-hand scale), and unemployed (right-hand scale) from 2019 to 2022.

Over the period 2019-2022, the labor market has improved substantially. The labor force has grown by over 57,000 people over that time, reaching 2.371 million by December 2022.

FIGURE 6: SOUTH CAROLINA LABOR FORCE, 2019-2022

Source: U.S. Bureau of Labor Statistics

Over time employment has risen, climbing by 54,000 people to 2.294 million people in December 2022, a 2.4 percent increase from January 2019. Unemployment has increased slightly over the four-year period from 74,297 in January 2019 to 77,159 in December 2022. The peak unemployment during the period was 271,601 people in April 2020, with the low being 56,580 in September 2019.

Unemployment Rate Trends

The unemployment rate is the percentage of the labor force that is unemployed. In January 2019, the rate stood at 3.2 percent and by the end of 2022, the rate was fairly unchanged at 3.3 percent. In September 2019, South Carolina matched its lowest-ever unemployment level of 2.4 percent. Likewise, the U.S. unemployment rate dropped slightly, changing from 4.0 percent to 3.5 percent over the same period. During this four-year period, the high was reached in April 2020 with an 11.7 percent unemployment rate in South Carolina, compared to a 14.7 percent rate nationally.

Figure 7 highlights the movement of the unemployment rates over the recent four-year period. From January 2019 to September 2019, South Carolina's unemployment rate maintained a consistent downward trend. The unemployment rate then peaked at 11.6 percent in April 2020 and since then has been slowly recovering, ending 2022 at a 3.3 percent unemployment rate.

FIGURE 7: SOUTH CAROLINA UNEMPLOYMENT RATE COMPARED TO NATIONAL

Source: U.S. Bureau of Labor Statistics

SOUTH CAROLINA INDUSTRY EMPLOYMENT AND WAGES

South Carolina had more than 2.192 million wage and salary jobs in 2022, about 166,000 business establishments, and an average weekly wage of \$1,079. **Figure 8** displays the employment and wages for the state's industry sectors.

FIGURE 8: SOUTH CAROLINA INDUSTRY EMPLOYMENT AND WAGES, 2022

Industry Code	Industry Title	No. of Establishments	Average Employment	Average Weekly Wage	No. of Establishments Growth	Average Employment Growth	Average Weekly Wage Growth
10	All Industry Total	166,564	2,192,209	\$1,079	9.4%	4.7%	7.2%

Health Care and Social Assistance had the highest employment with just under 290,000 jobs, followed by Manufacturing with just over 263,000 jobs and Retail Trade at almost 260,000. Of the approximate 166,000 business establishments in the state, almost 27,000 were engaged in the Professional and Technical Services industry, about 19,000 were in Retail Trade, and a bit under 16,000 were in Health Care and Social Assistance. The highest weekly wages were found in the Utilities sector at \$1,779, followed by Management of Companies and Enterprises with a wage of \$1,712, and Wholesale Trade at \$1,631. Accommodations and Food Services had the lowest average weekly wages of \$481, followed by Arts, Entertainment, and Recreation at \$511.

In terms of percent change from a year ago, the state's average employment increased by 4.7 percent. Arts, Entertainment, and Recreation employment grew the most at 25.4 percent, followed by Professional and Technical Services at 12.4 percent. Administrative and Waste Management was the only sector with a decline in growth at -0.8 percent. Information grew the most among establishments at 26.1 percent, with no industries having a decline in the number of establishments. Average weekly wages overall grew by 7.2 percent over the past year. Accommodation and Food Services increased the most at 13.7 percent, followed by Other Services (Except Public Administration) with a growth of 11.5 percent and Transportation and Warehousing at 11.4 percent. Management of Companies and Enterprises had a decline in wage growth at -4.7 percent, as did Finance and Insurance at -1.6 percent.

Emerging Industries

Emerging industries and occupations in South Carolina present opportunities for economic growth and innovation. By identifying and supporting these sectors, the state can create new jobs and business prospects, driving overall economic expansion.

Emerging industries are characterized by their smaller size compared to the state's average industry employment (22,316), but they exhibit a concentrated statewide presence (measured by location quotient greater than 0.75) and are projected to grow faster than the state's average rate (11.97 percent).

As industries evolve and technologies advance, the demand for specific skills and job roles changes. Recognizing emerging industries enables policymakers, educators, and individuals to prepare for the future job market and acquire the necessary skills to remain relevant. **Figure 9** below illustrates those industries in the state at the 3-digit industry level.

FIGURE 9: SOUTH CAROLINA EMERGING INDUSTRIES

Noteworthy sectors, such as Manufacturing, Trade, and Transportation, offer competitive advantages and significant growth potential. The state's focus on these industries, along with workforce development, has contributed to South Carolina's continued success in economic development.

Diversifying the economy by embracing emerging industries reduces dependency on traditional sectors. This enhanced diversification can provide economic resilience, making the state less vulnerable to economic downturns or external shocks.

SOUTH CAROLINA OCCUPATION EMPLOYMENT AND WAGES

South Carolina had 2.152 million wage and salary occupational employees in 2022 with an average hourly mean wage of \$24.35. The state saw an increase of almost 85,000 workers since 2021, as well as increases in average hourly mean wage (\$1.52) and average hourly median wage (\$0.78) in the past year. **Figure 10** summarizes more than 800 detailed occupations into major occupational groups and presents employment and average wage information.

FIGURE 10: SOUTH CAROLINA OCCUPATIONAL EMPLOYMENT AND WAGES, 2022				
Occupation Code	Occupational Title	Total Employment	Hourly Mean Wage	Hourly Median Wage
00-0000	All Occupations	2,152,300	\$24.35	\$18.69

Source: U.S. Bureau of Labor Statistics, Occupational Employment and Wage Statistics (OEWS), 2022

The Office and Administrative Support Occupations category had the highest employment with 291,770 jobs, followed by Sales and Related Occupations with 215,620, and Food Preparation and Serving Related Occupations with 208,950 employees. The highest average hourly wages were found in Management Occupations at \$52.81 per hour, Computer and Mathematical Occupations at \$42.19 per hour, and Healthcare Practitioners and Technical Occupations at \$42.09 per hour. Food Preparation and Serving-Related Occupations had the lowest average wage at \$12.81 per hour.

Emerging Occupations

Similar to emerging industries, emerging occupations are relatively small in size (lower employment level than the average occupation of 3,315) but are projected to grow above the state average rate (11.97 percent) and have an employment concentration of greater than 0.75. Twenty-nine of the sixty-nine occupations that fit this description are in Health Science and Manufacturing career clusters, followed by Hospitality and Tourism, then Transportation, Distribution and Logistics. **Figures 11 and 12** present a listing of emerging occupations.

Source: DEW, Employment Projections Program; U.S. Bureau of Labor Statistic

Examples of emerging occupations include Physicians Assistants, Speech-Language Pathologists, and Nurse Practitioners in the Health Science field.

Occupations that typically require education beyond high school comprise 45 percent of all emerging occupations, while those requiring a high school diploma alone are 46 percent of the total.

Recognizing emerging occupations is vital as they cater to evolving consumer needs and preferences. Businesses can adapt their strategies and product offerings to remain relevant and competitive in the marketplace. By staying attuned to these trends, South Carolina can continue to foster economic growth and innovation in the state.

Source: DEW, Employment Projections Program; U.S. Bureau of Labor Statistics

Ushers, Lobby Attendants, Ticket Takers, Concierges, and Tour and Travel Guides are examples of occupations in the Hospitality and Tourism career cluster, while several types of machine operators appear in the Manufacturing cluster.

Recognizing these emerging areas helps bridge skill gaps and prepares the workforce for future demands, ensuring individuals remain employable.

Top In-Demand Occupations

Registered nurses are in great demand by South Carolina employers, as are retail salespersons; first-line supervisors of retail sales workers; sales representatives, wholesale and manufacturing, except technical and scientific products; and customer service representatives. **Figure 13** lists those top occupations that employers request in job advertisements in the state in 2022.

FIGURE 13: SOUTH CAROLINA'S TOP 25 IN-DEMAND OCCUPATIONS, 2022

Occupation Code	Occupational Title	S.C. 2021 Average Hourly Wage
29-1141	Registered Nurses	\$33.45
41-2031	Retail Salespersons	\$12.99
41-1011	First-Line Supervisors of Retail Sales Workers	\$19.87
41-4012	Sales Representatives, Wholesale and Manufacturing, Except Technical and Scientific Products	\$31.48
43-4051	Customer Service Representatives	\$16.83
35-3023	Fast Food and Counter Workers	\$10.30
53-3032	Heavy and Tractor-Trailer Truck Drivers	\$22.70
49-9071	Maintenance and Repair Workers, General	\$19.77
11-9199	Managers, All Other	\$53.37
15-1252	Software Developers	\$49.34
11-9051	Food Service Managers	\$27.95
53-7062	Laborers and Freight, Stock, and Material Movers, Hand	\$15.43
11-9111	Medical and Health Services Managers	\$53.99
43-6014	Secretaries and Administrative Assistants, Except Legal, Medical, and Executive	\$17.98
11-1021	General and Operations Managers	\$45.53
37-2011	Janitors and Cleaners, Except Maids and Housekeeping Cleaners	\$12.05
31-1128	Home Health and Personal Care Aides	\$11.39
53-7065	Stockers and Order Fillers	\$14.30
15-1299	Computer Occupations, All Other	\$46.25
35-3031	Waiters and Waitresses	\$10.57
29-2061	Licensed Practical and Licensed Vocational Nurses	\$22.34
41-2011	Cashiers	\$10.94
29-2099	Health Technologists and Technicians, All Other	\$18.13
31-1131	Nursing Assistants	\$14.07
35-1012	First-Line Supervisors of Food Preparation and Serving Workers	\$17.86

Labor Market Supply-Demand Gap

A tool workforce professionals use to help them understand the labor market is the supply-demand gap analysis. A gap analysis of labor supply and demand compares the number of student completions from public and private postsecondary institutions to projected annual job openings that require education beyond high school. This analysis uses data from the National Center of Education Statistics, Integrated Postsecondary Education Data System (IPEDS), and compares it to the latest available analysis on the average annual job openings from DEW's Occupational Employment Projections Program, 2020-2030, which shows the annual openings over the 10-year projection period. The openings shown are for those occupations requiring more than a high school education, as defined by the U.S. Bureau of Labor Statistics (BLS). The job openings data details the expected annual job openings and includes the typical educational job requirements to enter the occupation, the work experience needed for the job, the on-the-job training needed for the position, and the occupational code, which is matched to one of 16 education-based career clusters.

A note to consider when examining the BLS assignment of the typical educational requirements for entry into an occupation is that it does not include all paths of entry. Many positions require higher levels of education than the level stated by BLS. In addition, changing entry requirements for some occupations may lead to higher educated individuals entering jobs than those who already hold a similar position.

The IPEDS program completer database covers the year 2021 and includes the Classification of Instructional Programs (CIP) code, the type of completed award, the institution type, and the number of graduates. Each CIP code is matched to one of 16 career clusters for comparison to the job openings data.

The IPEDS databases were summarized by career cluster and award type. The job openings were summarized by career cluster for the education levels above high school. Figures 20, 21, and 22 present tables highlighting the entire analysis.

There were 60,500 postsecondary graduates in 2021 with over 2,000 obtaining Doctoral degrees, 7,300 obtaining Master's degrees, 29,400 obtaining Bachelor's degrees, and 21,800 obtaining an award below Bachelor's degree level. The career clusters with the highest number of graduates were Education & Training (11,751) with roughly half earning certificates or Associates degrees in Liberal Arts and Sciences, Health Sciences (10,497) with over a quarter earning Associate and Bachelor's degrees in Registered Nursing, and Science, Technology, Engineering & Mathematics (8,861) with 20 percent earning degrees in Biological Sciences. The largest number of graduates was in the Education & Training cluster for those earning less than a Bachelor's degree (5,890).

There were 72,200 job openings in 2021 requiring education beyond high school with the highest demand for those having a Bachelor's degree (38,961) and those having less than a Bachelor's degree (26,816). The career clusters with the highest demand for workers were Health Sciences (15,434), Education & Training (12,447), and Business Management & Administration (11,981). The highest demand is for workers in Business Management & Administration with a Bachelor's degree (9,473).

Source: National Center for Education Statistics (NCES), Integrated Postsecondary Education Data System (IPEDS); DEW, Employment Projections Program, SC 2020-2030

There were almost 11,700 more job openings than graduates in 2021. There is a labor supply shortage in each award category except for Master's degree. The career clusters with the highest supply shortages are Transportation, Distribution & Logistics (-5,208), Business Management & Administration (-4,967), and Health Sciences (-4,937). The career clusters with the highest labor over-supply are Science, Technology, Engineering & Mathematics (6,170), Human Services (1,708), and Manufacturing (1,142). Of the 64 career cluster-award level combinations, 19 showed labor supply shortages with the highest shortage for Bachelor's degrees in the Business Management & Administration cluster (-5,737).

The gap analysis is just a representation of the true gap between labor supply and labor demand. Of course, more than just recent graduates would be able to fill the projected job openings, such as those who are unemployed or not in the labor force and who hold the credentials to qualify for a particular position. The analysis also does not consider potential out-of-state candidates that could fill in-state job openings.

POST-SECONDARY EMPLOYMENT OUTCOMES

Post-Secondary Employment Outcomes (PSEO) data provide earnings and employment outcomes for college and university graduates by degree level, degree major, and post-secondary institution. These statistics are generated by matching university transcript data with a national database of jobs and are made possible through data-sharing partnerships between universities, university systems, State Departments of Education, State Labor Market Information offices, and the U.S. Census Bureau.¹

Figure 17 shows the average median earnings by PSEO and year, with year 10 equating to the highest average earnings and year one equating to the lowest average earnings. The Doctoral – Research/Studies award level has the highest entry level wages at just under \$70K. Year 10 wages show the highest average wage, with each year increasing about \$10K.

FIGURE 17: AVERAGE MEDIAN EARNINGS BY PSEO AND YEAR

Award Level	Year 1	Year 5	Year 10
Certificate <1 year	\$29,601	\$38,221	\$43,162
Certificate 1-2 years	\$31,217	\$39,816	\$45,829
Certificate 2-4 years	\$25,968	\$35,535	\$40,930
Associates	\$36,589	\$43,780	\$49,680

SOUTH CAROLINA GROSS DOMESTIC PRODUCT

South Carolina's economy has continued to expand over the past several years. **Figure 19** displays the state's Gross Domestic Product from 2019 to 2022 and the percent gain for each year. By 2022, South Carolina had a \$295 billion economy, which has continued to have strong growth.

FIGURE 19: SOUTH CAROLINA GROSS DOMESTIC PRODUCT (GDP) IN MILLIONS OF DOLLARS, 2019-2022

Gross Domestic Product (millions of chained 2012 U.S. dollars)				Percent Change		
2019	2020	2021	2022	2020	2021	2022

Figure 20 shows South Carolina's GDP in current dollars broken down by quarter from 2019-2022. The annotations show where S.C.'s economy had the highest GDP so far in Q4 2022 at \$304 billion and the lowest GDP for the period in Q2 2020 at \$227 billion. Note that the only two declines in GDP were seen in the first half of 2020 during the initial wave of the COVID-19 pandemic.

FIGURE 20: SOUTH CAROLINA GROSS DOMESTIC PRODUCT (GDP), 2019-2022

Source: U.S. Bureau of Economic Analysis

To show the underlying trends on a more detailed level, **Figure 21** presents the real gross domestic product on an industry basis. This is an inflation-adjusted measure that makes seeing a trend easier. The table shows an overall growth of 2.4 percent from 2021 to 2022. The top industry in 2022 was Finance, Insurance, and Real Estate, followed by Manufacturing. The Information industry showed the biggest increase in output from 2021 to 2022 at 17.8 percent. The Construction industry had the most significant decrease in output from 2021 to 2022 at -10.8 percent, followed by Retail Trade and Nondurable Goods Manufacturing within the Manufacturing industry.

FIGURE 21: SOUTH CAROLINA REAL GROSS DOMESTIC PRODUCT (GDP) 2021 TO 2022 COMPARISON

Description	2021	2022	Percent Change
All Industry Total	\$221,045	\$226,420	2.4%

FOREIGN TRADE

South Carolina has had a significant decline in their trade exports since 2019 but began to recover ground in 2022, as shown in **Figure 22**. Transportation Equipment is 45.5 percent of the total value of exports, with Chemicals, then Plastics and Rubber Products following. All the top export industries were in Manufacturing, highlighting the sector's value to the state. Transportation Equipment continues to remain the top export industry for South Carolina; however, Transportation Equipment decreases over the past years contribute to the majority of South Carolina's decrease in total trade exports.

FIGURE 22: SOUTH CAROLINA'S TOP 10 EXPORT INDUSTRIES

NAICS Code	Industry	2019	2020	2021	2022	% of Total
	Grand Total	\$41,461	\$30,291	\$29,656	\$31,461	100%

Brazil	\$540	\$462	\$624	\$719	55.6%	2.3%
World	\$41,461	\$30,291	\$29,656	\$31,461	3.9%	100.0%

Source: U.S. Census Bureau, Foreign Trade Division

South Korea, as a state trade partner, had the largest percent change in the time period 2020-2022 at 60.9 percent, followed by Brazil at 55.6 percent, and Mexico at 30.9 percent. Over that period, the only countries in the top 10 with a decrease in exports from the state are Japan at -35.3 percent and China at -4.9 percent.

PRIORITY POPULATIONS

South Carolina citizens and its workforce are very diverse. Different population groups often face varying challenges and barriers and may need more specific or dedicated services to meet their employment and training needs. The State Workforce Development Board (SWDB) focuses on several priority populations as described below.

Juvenile Offenders

In Fiscal Year (FY) 2021-2022, the S.C. Department of Juvenile Justice (DJJ) handled 13,481 new cases, an increase from 9,099 in 2020-2021. The top five offenses putting a person into DJJ custody are assault and battery, simple marijuana possession, truancy, being a runaway, and contempt of court. During FY 2021-2022, 11,980 youth were served through DJJ's Teen After-school Centers (TASC) and various community-based intervention programs located throughout the state. This program highlights keeping youth in school, at work, and engaged in the community to improve outcomes.²

Temporary Assistance for Needy Families (TANF)

In fiscal year 2022, South Carolina had an average of 14,860 recipients of TANF benefits every month. Child recipients accounted for 12,215, or 82 percent, of the total. Throughout the fiscal year, the number of recipients dropped from 15,559 to 14,308.³ One in every 305 South Carolina residents receives TANF benefits, ranking 20th out of the 50 states. This group may have difficulty obtaining a family-sustaining wage. Even when they have jobs, the pay is often low. Training and employment support should be provided as this group may often lack the education and needed skills to get a better job.

Ex-Offenders

As of June 30, 2022, South Carolina had an inmate population of 15,985. For FY 2022 (July 1, 2021 – June 30, 2022), the S.C. Department of Corrections (SCDC) had 5,106 total releases from its base population. The average age of an inmate was 40.7 years old. African Americans made up 58 percent of the total, with whites at 39 percent, and other races at 3 percent. The average sentence length is 5 years and 5 months. Fifty-five percent of inmates do not have a high school diploma or GED upon entering incarceration.

The SCDC had numerous individuals reaching achievements in FY 2021, including 82 GED/High School Diplomas Earned and 812 Vocational Certificates earned. The SCDC has been authorized as a Department of Labor (DOL) apprenticeship site but did not award any DOL apprenticeship credentials in FY 2021. However, 902 WorkKeys certificates were awarded. SCDC, in partnership with the Department of Employment and Workforce, transitioned to the new WIN Learning - Ready to Work certification program in FY 2021.⁴

People who have been imprisoned face several challenges re-entering society, not least of which is overcoming their past criminal history when seeking employment. Lack of education, poor computer skills, poor people skills, low self-esteem, substance abuse problems, and access to transportation are problems that may be faced by an ex-offender during the job search.

<https://www.doc.sc.gov/research/AccountabilityReportFY2021.pdf>

Veterans

According to the 2021 American Community Survey, South Carolina had 350,822 civilian veterans aged 18 or older, making up 8.9 percent of the state's civilian adult population. Veterans had a higher percentage of having some college education or an associate's degree compared to the population aged 25 and older as a whole (38.6 percent for veterans, 30.1 percent for all). Veterans had a lower unemployment rate of 4.2 percent than the civilian population aged 18 to 64 (5.3 percent).⁵

Veterans may have to overcome stereotypes, such as employers thinking that all post 9/11-veterans have post-traumatic stress disorder (PTSD). However, veterans have a great deal to contribute to any company. Many veterans have job skills that transfer directly to the civilian world, such as integrity, attention to detail, leadership, problem-solving, and a team-player mentality.

Disabled

Estimates from the American Community Survey in 2021 show that 14.3 percent of the state's civilian noninstitutionalized population was disabled.⁶ The disabled employed equaled nearly 132,179 people aged 18 to 64 in 2021. Nearly 19,000 more people were unemployed, yielding a disabled unemployment rate of 12.5 percent. Ambulatory difficulty was the top disability for both those employed and those not in the labor force, while cognitive difficulty was reported as the top disability for those who were unemployed.⁷ Therefore, this group will continue to need focused services to overcome substantial barriers to employment.

Homeless

South Carolina's sheltered homelessness population was estimated at 3,608 people in 2022, down 15.8 percent from 2020, including 359 veterans, according to the U.S. Department of Housing and Urban Development. A total homeless rate of 7 per 10,000 people were experiencing sheltered homelessness. "Because of pandemic-related disruptions to counts of unsheltered homeless people in January 2021, these findings focus on people experiencing sheltered homelessness."⁸

According to the National Alliance to End Homelessness, the first step in supporting the homeless population is to get them into housing. The Alliance suggests rapid rehousing because, "By connecting people with a home, they are in a better position to address other challenges that may have led to their homelessness, such as obtaining employment or addressing substance abuse issues."⁹

Long-term Unemployed

The U.S. Bureau of Labor Statistics considers someone unemployed for 27 weeks or more to be long-term unemployed. In 2022, South Carolina had 17,000 people in this category with a total of 80,000 unemployed.¹⁰ DEW has several programs that can help this population regain employment.

Low Income

In 2021, South Carolina had an estimated 718,345 people living below the poverty level, or 14.5 percent of the population. Of this group, nearly 154,876 were employed, and 41,127 were unemployed.¹¹ Government assistance and educational support can help many of these individuals reach sustainable income levels.

This workforce product was funded by a grant awarded by the U.S. Department of Labor's Employment and Training Administration. The product was created by the recipient and does not necessarily reflect the official position of the U.S. Department of Labor. The Department of Labor makes no guarantees, warranties, or assurances of any kind, express or implied, with respect to such information, including any information on linked sites and including, but not limited to, accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability or ownership. This product is copyrighted by the institution that created it. Internal use by an organization and/or personal use by an individual for non-commercial purposes is permissible. All other uses require the prior authorization of the copyright owner.

The Federal Government reserves a paid-up, nonexclusive and irrevocable license to reproduce, publish or otherwise use, and to authorize others to use for federal purposes: i) the copyright in all products developed under the grant, including a subgrant or contract under the grant or subgrant; and ii) any rights of copyright to which the recipient, subrecipient or a contractor purchases ownership under an award (including but not limited to curricula, training models, technical assistance products and any related materials). Such uses include, but are not limited to, the right to modify and distribute such products worldwide by any means, electronically or otherwise. Federal funds may not be used to pay any royalty or license fee for use of a copyrighted work, or the cost of acquiring by purchase a copyright in a work, where the Department has a license or rights of free use in such work, although they may be used to pay costs for obtaining a copy which is limited to the developer/seller costs of copying and shipping. If revenues are generated through selling products developed with grant funds, including intellectual property, these revenues are program income. Program income must be used in accordance with the provisions of this grant award and 2 CFR 200.307.
